APPLIED GEOPHYSICS

Contents Volume 34, 1995/1996

Research Papers

3-D tomographic imaging of anomalous conditions in a deep silver mine
M.J. Friedel, M.J. Jackson, D.F. Scott, T.J. Williams and M.S.Olson 1

Errors of 1-D interpretation of 3-D TDEM data in the application of mapping saltwater/freshwater contact
M.B. Rabinovich 23

Magnetotelluric measurements in an area of west-central Alberta where deep electrical conductivity and basin sediment geothermal anomalies coincide
A.R. Kalvey and F.W. Jones 35

Generalization of the iterative dissipative method for modeling electromagnetic fields in nonuniform media with displacement currents
B.Sh. Singer and E.B. Fainberg 41

Statistical evaluation of airborne gamma ray spectrometric data from the Magal Gebriel area, south Eastern Desert, Egypt
S.H. Abd El Nabi 47

Integrated geophysical study of the geothermal system in the southern part of Nisyros Island, Greece
E. Lagios and G. Apostolopoulos 55

Gravity modelling of an interface above which the density contrast decreases hyperbolically with depth
C. Visweswara Rao, M.L. Raju and V. Chakravarthi 63

Modelling of density interface with binomial density variation
V. Chakravarthi 69

Short Note

Extended theory of the 3-component coherency matrix
C.-F. Shieh 75

Letter to the Editor

Comments on: Benderitter et al., Application of the electrostatic quadripole to sounding in the hectometric depth range
J.R. Wait 79

Announcement

RAEG '95 81

Research Papers

An interpretation of the Magsat anomalies of central Europe
P.T. Taylor and D. Ravat 83

Imaging industrial contaminant plumes with resistivity techniques
O.A.L. De Lima, H.K. Sato and M.J. Porsani 93

Ground penetrating radar surveys of peatlands for oilfield pipelines in Canada
H.M. Jol and D.G. Smith 109

Direct calculation of thicknesses for high-velocity and underlying low-velocity layers using post-critical reflection times in a seismic refraction experiment
K. Sain and P.R. Reddy 125

Abstracts of papers presented at the 20th Meeting of the Nordic Association for Applied Geophysics, January 9–11, 1995, Trondheim, Norway 137

VOLUME 34 NO. 3

Research Papers

The boundary integral solution of a DC geoelectric problem for a 2-D body embedded in a two-layered Earth
M. Hvoždara and P. Kaikkonen 169
DC resistivity and IP methods in acid mine drainage problems: results from the Copper Cliff mine tailings impoundments
Yuval and D.W. Oldenburg 187
A joint application of radiomagnetotellurics and transient electromagnetics to the investigation of a waste deposit in Cologne (Germany)
B. Tezkan, M. Goldman, S. Greinwald, A. Hördt, I. Müller, F.M. Neubauer and G. Zacher 199
An iterative least-squares approach to depth determination from residual magnetic anomalies due to thin dikes
E.M. Abdelrahman and S.M. Sharafeldin 213
Search for correlation between radon and high-yield borewells in granitic terrain
D.V. Reddy, B.S. Sukhija and Rama 221

VOLUME 34 NO. 4

Research Papers

An audiomagnetotelluric study of the Meugueur-Meugueur ring structure, A iaufi Niger: ring dyke or cone sheet?
M. Ritz , W.L. Brown , C. Moreau and D. Ohnenstetter 229
A multiscale electrical survey of a lateritic soil system in the rain forest of Cameroon
H. Robain , M. Descloitres , M. Ritz and Q.Y. Atangana 237
Subsurface DC resistivity mapping: approximate 1-D interpretation
Y. Meheni , R. Guérin , Y. Benderitter and A. Tabbagh 255
TM reflection from an insulating layer within a lossy half-space
K.A. Nabulsi and J.R. Wait 271
Detection of the water level in fractured phreatic aquifers using nuclear magnetic resonance (NMR) geophysical measurements
I. Gev , M. Goldman , B. Rabinovich , M. Rabinovich and A. Issar 277
Synthetic radargrams from electrical conductivity and magnetic permeability variations
O. Lázaro-Mancilla and E. Gómez-Treviño 283
Transient response of a homogeneous half space with due regard for displacement currents
M. Goldman , V. Mogilatov and M. Rabinovich 291
